

CUSTOMER PRICING CATALOGUE

MartPoint Retail Pricing Catalogue

Annual software plans, implementation and optional services for growing retail and service businesses.

ANNUAL PLANS

ONLINE STORE INCLUDED

BUILT FOR GROWING BUSINESSES

All prices are stated in Nigerian Naira. Applicable taxes and third-party charges are excluded unless expressly stated in an issued quotation.

Effective date: 8 September 2026

Annual licence plans

Four annual plans for growing retail and service businesses. All plans include access to the standard customer-facing Online Store.

BASIC

N99,999

per year, per business account

Branches	1
Users	5
Main products	500
Product variations	10,000
Online products	500
Custom domain	Optional

STANDARD

N249,999

per year, per business account

Branches	3
Users	10
Main products	2,000
Product variations	50,000
Online products	2,000
Custom domain	Optional

PREMIUM

N499,999

per year, per business account

Branches	5
Users	25
Main products	5,000
Product variations	150,000
Online products	5,000
Custom domain	Optional

ENTERPRISE

N999,999

per year, per business account

Branches	10
Users	50
Main products	10,000
Product variations	500,000
Online products	10,000
Custom domain	Optional

What each plan includes

All limits apply to the entire subscribed business account.

LIMIT	BASIC	STANDARD	PREMIUM	ENTERPRISE
Annual licence	₦99,999	₦249,999	₦499,999	₦999,999
Branches	1	3	5	10
Users	5	10	25	50
Main products	500	2,000	5,000	10,000
Product variations	10,000	50,000	150,000	500,000
Products publishable online	500	2,000	5,000	10,000
Services	100	300	500	1,000
Media storage	2 GB	5 GB	10 GB	20 GB
Custom domain	Optional	Optional	Optional	Optional

The primary differences between the plans are capacity: branches, users, catalogue size, storage and online-product allowance. A custom domain is available on every plan at an additional cost.

What every Retail Cloud plan includes

Core capabilities are available across all plans.

Point of sale and sales management

Fast checkout and sales tracking.

Inventory and stock control

Track stock, transfers and purchases.

Product variations

Manage size, colour and option combinations.

Customer records

History, contact and follow-up information.

Supplier records

Supplier contacts and purchase history.

Purchases

Record stock receipts and supplier invoices.

Expenses

Track operating costs and outflows.

Business reporting

Clear reports for daily decisions.

User and role management

Staff accounts with controlled access.

Online Store

A standard customer-facing storefront.

Standard software updates

Regular improvements included.

Standard remote software support

Help with the software during business hours.

Products and product variations

A main product is one top-level catalogue item. For example, "Classic Polo Shirt" counts as one product. Its individual size and colour combinations count as product variations. A shirt available in five sizes and eight colours uses one main product and 40 product variations.

A simple product without variations uses one main-product allowance and one sellable inventory record.

Example: Classic Polo Shirt → 5 sizes × 8 colours = **1 main product + 40 product variations**.

Capacity, not features

The primary differences between plans are capacity: branches, users, catalogue size, storage and online-product allowance.

Included with every Retail Cloud plan

One standard Online Store is included with every active MartPoint Retail Cloud plan, subject to the product-publishing allowance of the selected plan.

- ✓ The customer supplies and uploads their complete product catalogue.
- ✓ MartPoint may create up to 20 sample products strictly for setup testing, demonstration and launch verification.
- ✓ MartPoint does not provide full product upload for any client as part of the annual licence.
- ✓ Catalogue preparation, product photography, bulk data cleanup and manual product entry are separately quoted services.
- ✓ Payment gateway transaction charges are charged separately by the selected payment provider.
- ✓ Custom storefront design is not included in the annual licence.
- ✓ A custom domain is not automatically included merely because an Online Store is included. Custom-domain registration, renewal and technical configuration are separately quoted where requested.
- ✓ There is no advertised visitor limit, but reasonable security, bandwidth, rate-limiting and fair-use controls apply.

Custom domains are available as an optional service and are not part of the standard plan quota.

Every deployment is assessed before implementation

The final implementation fee depends on the number of branches, data condition, configuration requirements, migration work, training format, location and launch support required. MartPoint will confirm the scope, timeline and fee in writing before implementation begins.

IMPLEMENTATION PACKAGE	STARTING PRICE	TYPICAL SCOPE
Essential Remote Implementation	From ₦50,000	One business, remote configuration, one scheduled remote training session and launch checks
Multi-branch Implementation	From ₦150,000	Multi-branch configuration, role setup, structured training and coordinated launch
Premium Rollout	From ₦300,000	More complex rollout, structured migration support, multiple training activities and launch coordination
Enterprise Implementation	From ₦500,000	Requirements discovery, rollout planning, complex configuration, migration and deployment coordination

Implementation is quoted after assessment. The starting prices above are not a promise that every deployment will be completed at the starting amount.

Implementation does not include unless expressly stated in the quotation:

- ✗ Full product upload
- ✗ Product photography
- ✗ Custom development
- ✗ Travel and accommodation
- ✗ Marketing
- ✗ Third-party subscription charges
- ✗ Catalogue writing or cleanup
- ✗ Image sourcing or editing
- ✗ Hardware supply
- ✗ Custom storefront design
- ✗ Ongoing store management

Need more capacity?

Add extra branches, users, products, variations, services or storage to your plan.

CAPACITY ADD-ON	ANNUAL PRICE
Additional branch	₦50,000 per branch/year
Additional 5 users	₦25,000 per year
Additional 500 main products	₦15,000 per year
Additional 10,000 product variations	₦25,000 per year
Additional 100 services	₦10,000 per year
Additional 5 GB media storage	₦10,000 per year

Co-terminus billing. Capacity add-ons run with the customer's main subscription and renew on the same date. Where an add-on is purchased during an active subscription term, MartPoint may calculate a prorated charge covering the remaining subscription period.

Product and product-variation increases are tracked separately. Purchasing additional products does not create additional product-variation capacity.

OPTIONAL SERVICES

Optional professional services

Additional services are available and quoted separately.

SERVICE	PRICE
Additional remote training session	₦40,000 per session
Onsite implementation or training	₦100,000 per day
Requirements/discovery session	₦75,000
Custom storefront design	From ₦150,000
Custom domain registration and configuration	Quoted separately
Custom software development	From ₦250,000
Data migration, catalogue cleanup or bulk product preparation	Quoted after assessment
Travel, accommodation and logistics	Quoted separately

Approval required. Optional services begin only after the customer approves the written scope and invoice. Onsite work is not included in the annual licence.

Offline/Local Deployment

MartPoint is also available as a locally installed licence.

ITEM	PRICE
Offline/Local MartPoint licence	Starting from ₦250,000 per year
Additional offline branch	Starting from ₦100,000 per year
Optional Annual Care plan	Starting from ₦150,000/year
Installation and implementation	Quoted after assessment

The licence is billed annually and must be renewed to remain active. Installation, migration, training, customisation, travel and optional annual maintenance are priced separately according to the approved scope.

MartPoint ERP

MartPoint ERP licence starts from ₦250,000 per year. The final licence and implementation price depends on the required modules, users, branches, workflows, migration, integrations, deployment model and support scope.

ERP deployments require an assessment and a formal quotation. The quotation will clearly state the licence term and renewal schedule, the modules included, implementation fees, renewal obligations and support coverage.

Commercial terms

- ✓ Retail Cloud licences are billed annually.
- ✓ Payment is required before licence activation or renewal.
- ✓ Implementation begins after the required payment and approval of scope.
- ✓ Upgrades can be added during an active term.
- ✓ Downgrades take effect at renewal unless MartPoint approves otherwise.
- ✓ Capacity add-ons co-terminate with the main subscription.
- ✓ The issued quotation and invoice define the final scope and amount payable.
- ✓ Third-party charges are not included unless specifically listed.
- ✓ Applicable taxes are additional unless the quotation says they are included.
- ✓ No refund or cancellation promise is made in this catalogue.
- ✓ Custom work and implementation timelines begin after all required information, access and payments have been received.

Support. Standard remote software support is included during MartPoint's published business hours: Monday to Friday, 9:00 a.m. to 5:00 p.m. WAT, excluding public holidays.

Your MartPoint subscription includes access to the software, usage documentation, updates applicable to your plan, and technical support for the MartPoint application.

Computers, tablets, barcode scanners, receipt printers, networking equipment, internet service, electricity, hardware installation, data entry, onsite setup, and onsite training are not included in the standard MartPoint subscription unless they are specifically stated in your quotation or service agreement.

Where required, MartPoint can recommend, supply, configure, or arrange compatible hardware and implementation services at an additional cost. These services may be delivered directly by MartPoint or through an approved MartPoint Implementation Partner.

Hardware supplied through MartPoint or an approved partner will be covered according to the applicable manufacturer or supplier warranty. MartPoint is not responsible for faults involving equipment, internet connectivity, electricity, or third-party services that were not supplied or configured by MartPoint or an approved implementation partner.

Our team will provide guidance on compatible equipment, installation requirements, and setup best practices to help you operate MartPoint successfully.

Choose the plan that fits your business.

Start with an annual Retail Cloud plan and add capacity, implementation or services as you grow.
