

USER GUIDE

Your everyday guide to running the store.

Made for owners, managers, and cashiers. No technical jargon, just the buttons you press and the icons you see.

Report

Your first 5 minutes with MartPoint

Five simple steps from login to your first sale. Each step is one screen, one decision.

- 1 Open your store link and sign in**
Enter your username and password. If your business has several branches, pick the one you are working in today.
- 2 Check the Dashboard**
See today's cash position, quick-action buttons, and any alerts (low stock, expiring items, or pending payments).
- 3 Open the POS**
Tap **POS** on mobile or **Sales → POS** on desktop. The cart opens ready for items.
- 4 Add items to the cart**
Scan a barcode or type the product name. Adjust quantity, apply a discount if allowed, then choose the payment method.
- 5 Checkout and print**
Enter the amount received, confirm change, and save. The receipt can print, email, or download as PDF.

💡 **Pro tip:** If you forget a shortcut, ask MartPoint Assist. It can check stock, find customers, and start a sale for you.

ICONS

What the buttons and symbols mean

MartPoint uses small icons to save space. Here are the ones you will see every day.

Bottom menu (mobile)

The bar at the bottom of the screen lets you move between main screens.

Six things you will do most often

1. Make a sale

- Open POS
- Search or scan item
- Add customer (optional)
- Apply discount or coupon
- Pick delivery fee (if enabled)
- Choose payment and save
- Print or share receipt

2. Receive new stock

- Go to Purchase
- Select supplier
- Add items & quantities
- Enter batch or expiry date
- Save — stock updates automatically

3. Add a customer

Go to Customers

Tap New Customer

Enter name and phone

Set credit limit (optional)

Save — now you can bill them

4. Check stock

Go to Catalogue → Items

Type product name or scan

Choose branch

View Low Stock alerts

5. Record an expense

Go to Expenses → New

Pick category (rent, fuel, etc.)

Enter amount and date

Attach receipt photo (optional)

Save — it appears in daily summary

6. View daily summary

Open Reports → Daily Summary

Pick today or any date

See sales, profit, expenses

Export as PDF if needed

Troubleshooting made simple

If something does not behave, try the safe step first. Most issues are fixed with a refresh, a cache clear, or a quick check.

Cannot log in

- ✓ Check Caps Lock is off.
- ✓ Make sure you are on the correct store link.
- ✓ Ask the owner or admin to reset your password.
- ✓ If the page does not load, check internet or Wi-Fi.

Blank or white page

- ✓ Refresh the browser (Ctrl+R or Cmd+R).
- ✓ Clear browser cache and cookies.
- ✓ Try a different browser (Chrome is recommended).
- ✓ Contact your admin or support if it persists.

Barcode does not scan

- ✓ Wipe the scanner lens and barcode.
- ✓ Make sure the scanner is in "keyboard" mode.
- ✓ Try typing the code manually into the search box.
- ✓ Confirm the item has a barcode saved in the system.

Receipt not printing

- ✓ Check printer power, paper, and connection.
- ✓ Tap the Print icon and wait for the browser dialog.
- ✓ For thermal printers, confirm it is set as the default.
- ✓ You can also email or download the receipt as PDF.

Sale will not save

- ✓ Check all required fields are filled.
- ✓ Make sure there is enough stock for the items.
- ✓ Discounts over a limit may need a manager PIN.
- ✓ If offline, the sale is queued and will sync automatically.

App feels slow

- ✓ Close unused browser tabs or apps.
- ✓ Clear cache and refresh.
- ✓ Check internet/Wi-Fi signal strength.
- ✓ Restart the browser or device.

Idle timeout & screen lock

MartPoint can warn you and lock the screen when no one is using it. This protects your store data if a cashier or user walks away.

Idle warning

After the set number of minutes with no mouse, keyboard, or touch activity, a dialog appears and counts down. Tap **Stay logged in** to keep working.

Snooze screen

If the store owner enables Snooze, the screen freezes with a campaign/flyer instead of logging out. The user unlocks with their password or approval PIN.

Where it is set

Owners and managers set it in **Store Settings** → **Session Lock**. They choose the idle time in minutes, the warning countdown, and whether to show a campaign image.

What users should do

Do not leave a half-finished sale on screen. Put it on **Hold** or finish and save it before stepping away. If the screen snoozes, unlock it with your own password.

Help is built in.

Use the support portal, chat, or call us. We are here to help with the software; your devices, internet, and printers are handled by your team or IT partner.

Office Hours

Mon–Fri, 9am–5pm

MartPoint Assist chat

The chat bubble appears on every mobile and desktop screen. Tap it to ask things like:

- "How many units of sugar do we have?"
- "Find customer John"
- "Create a sale for Jane"
- "View today's summary"

When you contact support

To help us solve your issue faster, please include:

- ✓ Your store name and branch
- ✓ What you were trying to do
- ✓ The exact steps that led to the issue
- ✓ A screenshot or error message if possible

Support and Implementation Coverage

Your MartPoint subscription includes access to the software, usage documentation, updates applicable to your plan, and technical support for the MartPoint application.

Computers, tablets, barcode scanners, receipt printers, networking equipment, internet service, electricity, hardware installation, data entry, onsite setup, and onsite training are not included in the standard MartPoint subscription unless they are specifically stated in your quotation or service agreement.

Where required, MartPoint can recommend, supply, configure, or arrange compatible hardware and implementation services at an additional cost. These services may be delivered directly by MartPoint or through an approved MartPoint Implementation Partner.

Hardware supplied through MartPoint or an approved partner will be covered according to the applicable manufacturer or supplier warranty. MartPoint is not responsible for faults involving equipment, internet connectivity, electricity, or third-party services that were not supplied or configured by MartPoint or an approved implementation partner.

Our team will provide guidance on compatible equipment, installation requirements, and setup best practices to help you operate MartPoint successfully.
